

I strongly believe that the Indiana No-Call Act should remain as it currently is. The quality of my families life has greatly improved since signing up for the list. We no longer get unwanted solicitations from companies, even the companies that we may have a relationship with. We do not want calls on the telephone simply because it is not safe to do business on the telephone. I would never agree to anything someone was trying to sell me or sign me up for when they call me. I could not verify who the person on the other end of the phone really is and that is not safe. The calls used to interupt our time together as a family. Getting calls at meal times when time as a family is so precious. Please do not make any ammendments to the law as it is. Thank you.
